

MCSM-LDEO Field Experiences
Grouping

We will divide into working groups and teams to facilitate rotations among the stations and for the canoeing.

Each team should have 3 students. (If necessary, we can have a team of 4, but it makes for a tight fit in the canoe.)

On Friday morning at the Piermont pier, there will be three rotations (#1, 2, & 3), each lasting 40 minutes. There will be three teams in each group for these rotations.

On Friday afternoon, there will be two rotations (#4 & 5). One group will be divided to work with the other two groups during these.

For the Saturday canoeing on Saturday morning, each team will be in one boat.

Based on this information, provide the names and grades for the members of each team.
