

Earth and Space (Astronomy) ILS Vocabulary

apparent motions
asteroids
celestial
comets
coordinate system
day
distances between stars
eclipses
gravity
horizon
latitude
length of day (daylength)
length of the year
longitude
meteor showers
moons
orbit
phases of the Moon
phenomena
planets
revolution (revolve)
rotation (rotate)
shape of Earth
star
Sun
system of time
tides
tilt of Earth's axis
year
