1. What are five things that you’ll study in an Earth Science course?

2. Where have you learned about your planet before this course? (Name as many sources as you can.)

3. What kind of Earth Science-related information do you need every day?

4. What are some of the most serious problems for people involving the lithosphere (solid Earth)?
5. What are some of the most serious problems for people involving the hydrosphere (waters on Earth)?

6. What are some of the most serious problems for people involving the atmosphere (gases in air)?

7. What are some of the most serious problems for people involving the cryosphere (ice on Earth)?

8. How would you rate the probability (low, moderate, high) that in the three years Englewood will have:
   - an earthquake
   - a hurricane
   - a tornado
   - a severe winter storm
   - a major flood
   - a drought
   - a volcanic eruption
